Favorable changes are taking place in he lower tunnel of the Julia S, in which work was resumed a few days ago. The round is softer, with lime coming in. The Copper Glance company as now in about 600 feet on its tunnel. A building or a motor, compressor and other machinery is in course of erection.

J. A. Kauffman shipped a car of good crade carbonate to the Taylor & Brunton ampler from the Deems this week Some oliphides are now being taken out. The Deems group seems guite promising.

beems group seems guite promising.

Joseph Leyson has finished the 100-foot incline on the Silver Cord claim of the Fine Tree Mining company's property. This group consists of four locations adjoining the Copper Glance group Savage, the Wyoming cattleman, is a principal owner.

ORES AND BULLION

Settlements for the Week Climbing

Back to the Normal.

In the ore and bullion market the week's settlements amounted to \$482-900, compared with \$472,200 for the pre-

vious one and, in a measure foretelling a new record at the close of August in

refreshing contrast with that of the two months preceding, although it is notorious that in each of those the out-

put of the diggings was overwhelmingly in excess of that indicated in the chart.

That it was not revealed in the state-

ments is that the plants of Colorado were experiencing a shortage and were

compelled to borrow from Utah, said

the management of the local furnaces, but even this should not be permitted to stand to Utah's discredit. However, causes that superinduced the distress

over there are said to have been over-

come and the local exhibit should get back to the normal the present month.

The Utah producer is perfectly willing to help his neighbor out in distress but is not willing that his interests be made

to suffer. The day's settlements in the

open market amounted to \$81,600, Mc-Cornick & Co. reporting them as they

follow: American bullion, \$33,900; gold,

silver, lead and copper ores, \$47,700. In the metal market silver ruled at 58

cents an ounce, lead at \$3.50@\$4.10 per hundred pounds, and casting copper at

WEEK ON 'CHANGE.

Dog Days Weighing With Damaging Effect on the Entire List. On the mining exchange the week's output was reduced to 89,765 shares of stock for which \$34,575.85 was paid, that of the iosing session to 80% shares that brought \$6015. Under the distressing torpor of dog days everything was depressed. There was no distinction. The investment by which so many dollars are being dropped each month into the dinner-pail the sturdy youngster and temperarily decrepit, all went down together. Crippled by the uncertain praise and leaden nothings from another expert—'a man who climbed up and down ladders until he was thred out"—Daly West was reduced yesterday to \$12.50, and under the agonizing weight of expert observations the shareholder is to be congratulated that it held up to that height. The Judge, with its interests less encumbered by expert disquisitions, recorded some gains during the close to \$4.40, while Grand Central, overcome by the loss of the August dividend, was offered down to \$1.50, with \$1 less to be had for it. Boston Con. refused at the lose to come down a cent below \$7, while Bullion-Beck, with the referce directing it to shell out troble damages, or over \$56,000 for 168 tons of ore, was an offering at \$1.50, with \$1.50 bid for Mammoth, by which another \$20,000 distribution will be made tomorrow. Overcome by the weight fits surroundings, Silver King was marketed down to an offering at \$45 yesterday, while the best to be had for United States, whose shareholders will draw Gown \$20,000 during the next few hours, was \$15.45, with \$1.60 asked for Horn Silver, which will come forward next month with another quarterly dividend. Ontarlo was weak and neglected, as was Daly, while trading in the list from Tonopah was completely suspended. Tetro, with its physical condition reflected in regular dividends was permitted to drop below \$2 cents, while Uncle Sam and Sacramento, whose shareholders are drawing \$200 in oil cents, while Con. Mercuir refused to 20015. Under the distressing torpor of deg days everything was depressed. There

EAD WINNERS TO SHELL OUT AGAIN

Another Crop of Dividends, Amounting to \$292,000, to Be Distributed on Monday.

The morrow will pass into history as another day of dividends in Utah. those who hold tickets in the drawings to take down no less than \$292,000, while dividends of \$115,500 have already been passed around during the month The capital prize in tomorrow's drawing has been dropped into the wheel by the United States Mining company, which deals out no less a sum than \$200,000, or 50 cents a share, this the tompany's first appearance, although its shareholders have received not a few hundred thousands from the Centennial Eureka mines since their acquisition by the United States Mining company. With the same turn of the wheel the shareholders of the Daly West will receive 40 cents a share or West will receive 40 cents a share, or \$72,000, this exceeding 25 per cent on yesterday's market valuation of its mines, and that the distribution from this source will be repeated next month not even the oracle in the East entertains a serious doubt. Along with these drawings is that in which the these drawings is that in which the Mammoth's flock will participate, the contribution from that source amounting to 5 cents a share, or \$29,000, while no figure now coming onto the market with its wealth is a more energetic one. A carvass among the offices from which tomorrow's generous blessings are to flow shows that they will be shared by nearly 4000 persons, representshared by nearly 4000 persons, representing as many stockholders, the checks going into every State in the sisterhood and into not a few lands across Of course, these facts gratifying to Utah, to every region in which mining is an industry

TREATMENT OF SLIMES

Close Saving Made on Material From Nevada Proposition.

allings from the Golden Eagle mine in Nevada, indicate quite conclusively that the Holderman process for the cyanidation of ores will be installed at the properties at an early day. Of the metallic contents of the tailings, con-sisting of gold of the value of \$4.20 with 3.7 ounces silver per ton, the trials show a saving of from 80 to 92 per cent of the former, with about 70 per cent of the latter at nominal expense, the material on which the tests were made showing 43 per cent slimes. It is understood that the properties are to be equipped with a plant of thirty tons daily capacity, the plans for it to be worked out at once.

Manager Thomas Ferguson of the

Holderman has gone to Stateline and Fay, where he will interest their misers in the new method while it likely that tests will be made on the gold-bearing ores out of Callente, and in which camp Hon. C. O. Whittemore of this city is now doing extensive work.

FINE GOLD-COPPER ORE.

Five Claims Located on Four-Foot Ledge North of Moapa. Special to The Tribune.

CALIENTE, Nev., Aug. 13.-Fred Bannock and Morris Ives came in from Moapa today with some fine looking samples of gold-copper ore taken from their Lost Hunter group, twenty-eight miles north of Moapa. They have lo-cated five claims on a ledge four fest wide at croppings, opening out to six and one-fourth feet, at a depth of sixty feet, in two shafts, one on the Three Ludies and one on the Old Cabin claims The values run in pyrites of copper and black oxide, between shale walls. They will have their ore assayed at Salt

George Bryan, owner of the Mizpah group of gold-copper claims northeast of Moapa twenty-six miles, reports having struck 26 per cent copper with \$4 in gold in his tunnet, which is now in eighty-five feet on a three-foot vein.

William Bullock and H. B. Tingley returned from Sait Lake today with as-says of \$23.40 gold and eleven ounces silver from their samples taken in last week from the Lost Cabin group of claims, eighteen miles east of Moapa and sixteen miles south of the line of the San Pedro road, where they have put in a twenty-foot tunnel on three claims. They have two and one-half to six-foot ledges and say they have shipping ore on all three claims.

The Callente Gold Mining company is working a day and night shift on its claim adjoining the townsite here. The mines are now in 190 feet and expect to crosscut a twenty-foot ledge of free gold within the next fifteen feet. George C. Fetterman, president of the com-pany is well pleased with the prospect and says the company will, after crosscutting, drift northwesterly on the ledge the full length of the claim, which will give more than 1200 feet of drift and from 110 to 400 feet of stoping ground.

The ore values at grass root are from \$35.40 to \$72 per ton in pure gold. If the property develops as its owners anticipate a large mill will be crected and the output of the mine treated here.

AROUND GOOD SPRINGS.

Gold Rock Worth \$140 Per Ton at

Depth of One Hundred Feet. Reports from Good Springs on the line of the San Pedro indicate good results wherever systematic endeavor is made, says the Lode of De La Mar, Nev.

In the shaft being sunk by Loup & Armstrong, and which has now reached

Armstrong, and which has now reached a depth of about a hundred feet, samples ranging from \$3 to \$16 per ton in gold are found, and enough high grade has been taken out to make shipments aggregating 160 tons. The vein also carries about 25 per cent in cinnabar.

About four miles east from the camp some good copper ore is found. The veins are on the foothills of Potosi mountain. A shipment of 250 tons from the Ninety-Nine group, after paying the expenses of hauling by team a distance of forty miles, and a long distance by rail, netted the company \$650, a little over \$30 per ton.

rst-class bank and commercial work.

PEMBROKE STATIONERY CO.

The Double-Up, owned by Kennelly and bits associates, shows a strong vein and

CROPS OF COPPER DURING THE WEEK

Big Tonnages of the Red Metal From the Various Furnaces in Salt Lake Valley.

From the ultra copper furnaces to the Eastern refinerles there was forwarded during the week \$04,025 pounds of copper bullion containing gold and silver and of the value of over \$200,000, the atal revealing an incipient shrinkage in the tonnage sent out, although the the formage sent out, although the volume produced has been quite up to the normal. At present the Utah Conis producing an average of 50,000 pounds of this class of bullion daily, said Manager Channing, a record which he has no doubt will be maintained the remainder of the year on an average of 709 tons of ore daily, although the next unit to be added to the plant will in-crease its capacity to 1000 tons or more. That this enlargement will be undertaken in 1905 is not unlikely although the mines will be made to provide the fund for it as were they for the unit which has just gone into commission. At the Bingham Con Superintendent Nutting has been pegging along during the week on three furnaces and prepar-ing for a heavier tonnage, which will be further increased when the fifth furnace goes into commission in October, while at the United States the produc-tion of high grade bullion appears to have settled down to figures quite uni-form, the record for the week closing as follows:

Bingham Con nited States

In addition to the copper builion from these sources the American Smelting & Refining company forwarded the usual volume of matte containing over 200,000 jounds of the red metal with the record from all sources exceeding a million pounds.

CONTINENTAL'S COPPER.

Red Metal Reveals Steady Increase in Second-Class Ores.

The cupric contents of the secondclass ore which has been coming steadnental company at Alta are gradually increasing and it is not unlikely that the metal will proponderate there as in the first-class ores before the end of sixty days. Beginning with indifferent percentages this metal has now risen to a point where it exceeds 4 per cent with the silver contents ruling at four-teen ounces and the gold from 80 cents to \$1.20 per ton. In another channel work is now progressing in ore that affords an average of 19 per cent cop-per with not a little silver and gold and of which a consignment will come in a short time. Meanwhile the experiments at the company's laboratory continue under the direction of Manager Henry M. Crowther, who hopes to soon arrive at the method that shall be employed in the reduction of the milling ores. the camp is to be further investigated by the geological survey was pleasing news to Mr. Crowther, as was it to every interest up there.

Discovery of Tellurium Ore.

Reports From Camps That Its Mapecial to The Tribune. Special to The Tribune.

GRAND ENCAMPMENT, Wyo, Aug. 13.—The first discovery of fluorine or telurium ore in the Encampment district has been made on Billy creek, twelve miles from Encampment. The vein is four feet wide, is in place, and assays from St to 316 per ton at the surface. Persons here have organized the Amethyat Gold Mining company and have sold 100,000 shares to Encampment citizens, who are somewhat excited over the find. Arrivals from Park City last night eport the management of the Comstock mines making active preparation for the starting up of the mill, while on the street it was said the plant would go nto commission at once. With which to supply it a large amount of ore at fine milling quality has been opened up and the run should result quite profit-ably, the first-class ore to come to the

Fluorine ores are great gold producers, especially in Cripple creek, and great hopes are entertained for the first vein of the kind in the camp.

Mining Notes.

Reports from Sunshine Indicate a steady grind at the Overland mill, al-though local interests do not expect of-ficial advices until the clean-up has been made.

The Tetro directors yesterday ordered the regular \$3000 distribution for September 1.

Superintendent Jacobson of the South Columbus has gone to his camp at Alta. P. W. Madson has gone to Gold Mountain to Inquire Into conditions at the Trapper's Pride, in which he is largely interested. Copper buillion is again arriving from

the Dixle smelter. Assays from the new ore body at the Utah of Deep creek show as much as 52 per cent copper, with 355 ounces of silver

The official household of the Martha Washington is being reorganized. Col. Wiswail has gone to Mercur to begin the season's campaign at the old Geyser-Marion, whose tailings are to be made to disgorge their wealth.

George A. Robertson, for many years superintendent of the Tintic company's Tintic interests, leaves for British Columbia tomorrow to superintend the Brittania mines out of Vancouver.

W. M. Johnson, manager of the New-house mines, will return from camp to-day, accompanied by Professor Emmons. Lou C. Joffs has returned from Beaver county, where he has been making an examination of mines.

Special to The Tribune.

MCDENA, Utab, Aug. 13.—Dr. J. A. Affieck of St. George went to Sait Lake City yesterday with some samples of ore from the Hope mine, situated in the Pennsylvania mining district, twenty-five miles southwest of Acoma, Nev., and about seven miles from Bradshaw. This is a trial shipment and what it will assay the doctor could not tell, but said that he believed it would average with former values, which gave from 50 to 350 conces in silver, 32 to 39 in gold and from 10 to Sper cent in copper.

The Hope has been worked intermittently for the past eighteen years and about fitteen years ago \$20,000 was taken from a stope about 100 feet from the mouth of the incline. The ore mined now is from the 200-foot level and there appears to be an abundance of it. C. W. Johnson is associated with Dr. Affieck in this mine. James E. Beverldge has returned from Idaho after conducting an examination of mines for Electern clients and is now awaiting the result of assays. He de-clined to discuss the proposition.

New Sun Typewriter, \$40. Carbons, ribbons for all machines. Pembroke sells them.
